## DETAILED ACTION

### *Withdrawal of Allowable Subject Matter*

The indicated allowability of claim 7-10 and 12 is withdrawn in view of the newly discovered reference(s) to SCHERF. Rejections based on the newly cited reference(s) follow.

### *Drawings*

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: the drawings do not include reference numbers (25) or (30). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "24" has been used to designate both "a pneumatic input section" and "a return section". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the

application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: there is no description for element numbers (25s) and (25r). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

Claims 7-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 7 and 8 detail the use of input and return connectors; however, the specification does not specifically detail these connections. Although there is a mention of the an input and return section, there is nothing specifically detailing the input and return connectors. The specification merely details connector that are threaded.

***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2,3,6 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #3,824,749 to SCHERF. In reference to claim 12, SCHERF discloses a molded gutter section (10A) including a liquid passage (LP), an air flow passage (29 or 30) adjacent thereto,

and a gutter wall (21) separating the liquid and air (29 or 30) passages; wherein the gutter (10A) includes two spaced apart walls (19,20) and a bottom wall (22) such that

Art Unit: 3635

the air passage extends through the bottom wall (22). Regarding claim 2, the air flow passage (29 or 30) is located within the bottom wall (22). In reference to claims 3 and 6, the air flow passages (29 or 30) comprises multiple linear air flow passages.

***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #3,824,749 to SCHERF. As detailed above, SCHERF. discloses the basic claimed gutter except for explicitly detailing non-linear air flow passages. The applicant has shown no criticality in linear and non-linear air flow passages, and as such, linear air flow passages are art recognized equivalents to non-linear air flow passages. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to select either linear or non-linear air flow passages whichever is suitable for the use intended as an obvious matter of design choice.

***Allowable Subject Matter***

Claims 7-10 appear to be allowable; however, allowance is held in abeyance until receipt of claims in conformance with 35 USC § 112.

***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
